EDUCATION

University of Waterloo

Waterloo, ON

Bachelor of Computer Engineering (Co-op) - **GPA: 3.7/4.0**

Apr. 2027

- **Relevant Coursework:** Data Structures and Algorithms, Operating Systems, Databases, Compilers, Systems Programming and Concurrency, Computer Security, Introduction to Machine Learning

TECHNICAL SKILLS

Languages: Python, JavaScript/TypeScript, Java, C++, C#, SQL

Frontend: React, Next.js, Tailwind CSS

Backend & Infrastructure: FastAPI, Flask, ASP.NET Core, Node.js/Express, Temporal, Docker, Kubernetes

AI/ML: RAG, OpenSearch, Pinecone, DeepEval, OpenAI API, Claude API, Voyage AI, Sentence Transformers

Cloud & Databases: AWS, Google Cloud Platform, PostgreSQL, MySQL, Snowflake

EXPERIENCE

Machine Learning Engineer

Jan. 2026 - Apr. 2026

BetterUp

San Francisco, CA

- Implemented a scalable Retrieval-Augmented Generation (RAG) system enabling BetterUp's AI coach to deliver personalized, context-aware coaching using Voyage AI embeddings, OpenSearch retrieval, and Temporal workflows
- Led the design and development of a RAG evaluation service using DeepEval and LLM-as-a-judge workflows to automate large-scale evaluation of production AI coaching pipelines
- Achieved **93%** average RAG evaluation scores across contextual relevance, precision, recall, faithfulness, and answer relevancy through prompt engineering and retrieval optimization
- Built GDPR/CCPA-compliant AI coaching data deletion services, enabling automated hard deletion and user data exports across distributed internal and external storage systems

AI Applications Developer

July 2025 - Aug. 2025

Encore Financial

Toronto, ON

- Built an AI-powered financial assistant using Anthropic's Claude API, Node.js/Express, and React, supporting real-time queries, document uploads, and dynamic context injection.
- Engineered a RAG pipeline with Voyage AI embeddings, Pinecone vector DB, and LLM driven prompt strategies, enabling intelligent conversations and accurate responses.

Software Developer

Jan. 2025 - Apr. 2025

titanium.agency

Waterloo, ON

- Developed real-time advertisement automation algorithms using C# and Flask through API integrations, leveraging GCP BigQuery, Cloud SQL, and MySQL for historical data analysis, enhancing data-driven decision-making.
- Cut page load times by **62%** through SQL query and stored procedure optimization, including targeted indexing, removing redundant computations, and simplifying aggregations.
- Reduced cloud costs by **30%** while improving query performance for transactional workloads by engineering a data archival workflow to transfer historical records from MySQL to partitioned BigQuery tables.

Full Stack Developer

Sept. 2023 - Dec. 2023

RIFO Holdings Group

Toronto, ON

- Enhanced realtor efficiency by processing and visualizing real-time housing data from **2.5M+** Canadian listings using React, ASP.NET Core, and MySQL, enabling seamless frontend-backend integration via RESTful APIs.
- Optimized data processing time by **95%** through parallel and asynchronous programming within API workflows, improving backend performance and enabling responsive user experiences.

PROJECTS

TailorResume -

React, Tailwind CSS, FastAPI, OpenAI, Sentence Transformers, NumPy

- Developed a full-stack AI-powered resume optimization tool using React, Tailwind CSS, FastAPI, and OpenAI to enable personalized resume tailoring through dynamic UI and backend integration.
- Leveraged LLMs, Sentence Transformers, NumPy, and cosine similarity to rank and rewrite user experiences by semantic relevance to job descriptions, enabling intelligent bullet reordering.
